
Stability Vector Differential Delay Equations

stability and stabilization of delay differential systems* - key words-delay differential equations; positive invariance; asymptotic stability. abstract-the delay systems considered here are represented by linear delay differential equations. the system parameters and the delays are assumed to be imperfectly known. the instantaneous state vector is perturbed by a **instability to nonlinear vector differential equations of ...** - instability to nonlinear vector differential equations of fourth ... differential without and with delay and vector differential equations without delay. our aim was to achieve the results ... lasalle, j. & lefschetz, s. 1961. stability by liapunov's direct method, with applications. mathematics in science and engineering. **stability analysis for delay differential equations with ...** - stability analysis for delay differential equations ... leping sun abstract. in this paper we are concerned with the asymptotic stability of the delay differential equation $x'(t) = a_0x(t) + \sum_{k=1}^n a_k x(t - \tau_k)$... norm of w subordinate to a certain vector norm. in order to specify the norm, **analysis of a vector-borne diseases model with a two-lag ...** - analysis of a vector-borne diseases model with a two-lag delay differential equation yusuf qaddura and nsoki mavinga abstract. we are concerned with the stability analysis of equilibrium solutions for a two-lag delay differential equation which models the spread of vector-borne diseases, where the lags are incubation periods in humans and vectors. **eigenvalue and stability of singular differential delay ...** - ential systems with delay. in [3-11,17-23], authors have discussed the singular differential systems, even the singular differential systems with delay, and have gotten some consequences. but up to now, for the relationship between eigenvalue and stability of singular differential systems with delay, there is hardly effective verdict. **stability of linear time-periodic delay-differential ...** - stability of linear time-periodic delay-differential equations via chebyshev polynomials ... between parametric period and the delay period. also, stability charts are produced for the ... t is an $m \times 1$ column vector of the polynomials and **stability analysis of delay-differential equations by the ...** - stability analysis of delay-differential equations by the ... difference equations for the chebyshev expansion coefficients of the state vector in the previous and current intervals. this defines a linear map which can be thought of as ... stability analysis of delay-differential equations 187 fig. 1. analytical stability chart of (2.1). **control and stability of the time-delay linear systems** - control and stability of the time-delay linear systems negras tahmasbi 1*, hojjat ahsani tehrani 1 ... differential equations [12]-[14] and respectively the lyapunov stability approach with the krasovskii and ... example 2. consider a discrete-time linear system with delay in state vector [27] (17)0 **a new instability result for a certain system of fourth ...** - and is still being used to obtain stability, instability, boundedness and existence of periodic solutions for ordinary differential equations, delay differential equations and functional differential equations. study on the unstable behavior of solutions for various certain scalar and vector, linear and nonlinear delay differential equations of **solution of a system of linear delay differential ...** - solution of a system of linear delay differential equations using the matrix lambert function ... classes of linear delay differential equations. examples are presented to illustrate by comparison to numerical methods. ... concerning stability of systems described by equations of **stability and boundedness in volterra integro-differential ...** - stability and boundedness in volterra integro-differential equations with delay cemil tunc, department of mathematics, faculty of sciences, yuzuncu yil university 65080, van - turkey abstract. in this paper, a class of non-linear vector volterra integro-differential equations of first order with constant delay is considered. **differential delay equations in chemical kinetics ...** - differential delay equations in chemical kinetics. nonlinear models: ... linear stability analysis of differential delay equations by a differential delay, or difference equation- ... where x is a vector of concentrations, and f is a vector of rate terms. to find the steady state(s) x , of a system like that de- ... **μ -stability of nonlinear positive systems with unbounded ...** - index terms—nonlinear, positive systems, time delay, un-bounded, μ -stability. i. introduction in many cases of the real world, states of systems should ... delay differential systems are obtained; [16] addresses the ... a vector field $f(x)$... **conditions of stability via positive invariance for delay ...** - considered delay systems are represented by a linear delay differential equation or by a linear delay difference equation. the system parameters and the delays are assumed imperfectly known. the instantaneous state vector (in the first model case) or the output vector (in the second model case) is perturbed by a bounded external disturbance ...
